37 Standon Crescent,
Wincobank,
Sheffield, 9.

Dear Geoff,

I enclose date of first-ascent 'Medusa' at Stoney Middleton as requested. April 1962.

Medusa. 'Hard Very Severe.'

This is a straight clean crack which runs up the centre of the second great ivy wall. Ascend the wall on good holds to a Tree, with difficulty now

enter the crack, using hand jams and some small holds inside the crack a short overhang is surmounted, more strenuous jamming now to a good stance at top of crack. The crack furthest to the right is now taken, a strenous pull to above the overhang, finish on smaller but less strenuous holds up the wall above. P.T.O.

will let you have the information you require from Ted Howard as soon as I here from him.

Yours faithfully

Len
